## Summary

I am a dedicated and detail-oriented Test Engineer with a year of experience in software testing. I have a strong passion for ensuring the quality and reliability of software products. My expertise lies in manual testing, test case creation, test execution, defect tracking, and test reporting.

I am skilled in using testing tools and technologies such as test management systems, bug-tracking systems, and automation frameworks. I am always eager to learn and stay updated with the latest trends and advancements in the field of software testing.

---

## Experience

### Test Engineer

DgNote Technologies

Dec 2022 - Present

As a Test Engineer at DgNote, my current company, I am involved in ensuring the quality and reliability of software products through comprehensive testing procedures. I work closely with the development team to understand project requirements, create test plans, and execute test cases.

### QA Trainee

Brained

Jun 2022 - Nov 2022 (6 months)

During my 6-month internship at Brained, I had the opportunity to learn and work on various aspects of software testing. I gained hands-on experience in both manual and automated testing methodologies. I was involved in the detailed testing of web applications, mobile applications, and desktop software.
